

# MY SMILE BOOK

Your dentist needs help to  
keep your teeth healthy.  
Meet your oral health helpers

It's important to brush your  
teeth twice a day. Help the  
toothbrush find the tooth!

When brushing, be sure to reach even your back teeth. Connect the dots to finish brushing.

Eating healthy foods will keep  
your teeth healthy. Circle the  
healthy foods for your teeth.

Everyone's teeth are different.  
Find the 6 differences between  
the top and bottom photo.

Just like you and me, animals  
have different teeth,  
sometimes called tusks.

Help each animal find their missing tooth or tusk. Draw a line from the animal to their tooth.

The Tooth Fairy says, keep your  
teeth and gums healthy and  
don't forget to smile!
